| Dietert, Franz     | Classified Affairs   |

The State Administration for State Reserves has the task of stockpiling supplies of all kinds, especially strategic materials, for the national army, the Volkspolizei, Dienst fuer Deutschland, and on the orders of the military administration of the Soviet Control Commission.

2. The State Reserve for Foodstuffs.

Towards the end of 1952, several East German Ministers intervened with the SGC to obtain permission to draw upon the food reserves in order to alleviate the acute food shortage. The Soviets refused; instead, they removed food from the state reserves in order to fulfill reparations requirements and to supply the Red Army stationed in the Zone.

3. The State Reserve for Foodstuffs is heavily dependent on the existing refrigeration facilities of the Soviet Zone. The Central Committee of the SED has been directly concerned with the construction of new refrigeration depots. A total of nine refrigeration depots for the State Administration for State Reserves is under construction during the first half of 1953. During 1952, the East German government confiscated a total of 56,000 cubic meters of refrigeration space for the benefit of the Administration for State Reserves. All refrigeration rooms which remain under communal or district administration are also to be confiscated during the first quarter of 1953 and placed under the above secretariat.

4. On 15 January 1953 the following amounts of foodstuffs were stored in the State Reserve:

|  |                   |
